
Gestational diabetes

Local committee: Duhok_LC

Standing committee: SCOPH

Location: Obstetrics and Gynecology hospital, Duhok

Date/time :30/11/2017; 10pm

Aim: gestational diabetes is a type of diabetes which affects women during pregnancy due to many reasons, it has many risks on pregnant women and the baby , in this project we aimed to do some awareness involving pregnant women with best advices about how to care of their health during pregnancy and measuring their blood sugar levels in order decrease the level of getting gestational diabetes.

Plan of action: we went to Duhok obstetrics and gynecology hospital ,we explained what is the gestational diabetes for more than 100 patients ,measuring their blood sugar level and giving them leaflets about the subject and how to prevent this type of diabetes .
