1. Qualification awarded	
Bachelor of Medicine and General Surgery (M.B.Ch.B)	
2. Length of programme	
Six (6) years (Divided into Phase I: 3 years and Phase II: 3 years)	
3. Number of credits	
277	
4. Level of qualification according to the National Qualification Framework and the European Qualifications Framework	
5. Field(s) of study (e.g. ISCED-F)	
Medicine (Integrated Basic Medical Sciences, Clinical Sciences, Behavioral Sciences, and Social Sciences)	
6. Specific admission requirements (if applicable)	
Subject to the central admission requirements according to the instructions of the Ministry of Higher Education and Scientific Research policy	
7. Specific arrangements for recognition of prior learning (formal, non-formal and informal) (if applicable)	
8. Qualification requirements and regulations, including graduation requirements	
Successful completion of the 6-year integrated curriculum (Phase I and Phase II), achieving the passing threshold in all core modules/blocks,. Must pass the End Phase 1 Assessment (EPA) and the Final Professional Examination (FPE). Subject to Examination Instructions of the Ministry of Higher Education and Scientific Research / Kurdistan Region of Iraq	
9. Profile of the programme	
. Profile of the programme The programme is a six-year integrated, system-based, student-centered, and outcome-based curriculum, modeled after the University of Leicester's British curriculum. It is divided into two 3-year phases: • Phase I (Foundation Phase): Focuses on foundational sciences with a 20-25% introduction to clinical sciences. Utilizes a module-based system (Semesters 1-6) that integrates subjects (e.g., anatomy, physiology, etc.) around bodily systems. Teaching is a combination of Large Group Lectures and intensive Small Group Discussions (SGD). It includes the Consultation Skills Foundation Course (CSFC) and the People and Disease (LwLTC) course. • Phase II (Clinical Curriculum): Focuses on clinical sciences (reversing the Phase I proportion). Learning occurs entirely in a purely clinical environment (hospital wards and	

centers) through seminars, clinical rounds, and clinical skills training, organized into 16 Clinical Blocks. The overall philosophy shifts from an instructor-centric to a student-centered model that emphasizes active learning, self-reliance, inquiry-based investigation, and the development of the lifelong learner.

10. Programme Educational Objectives

The overarching goal is to prepare future medical professionals to be lifelong learners who can adapt to continuous advancements in medicine.

Phase I Objectives: To gradually develop self-learning (active learning) skills; to provide essential knowledge and skills in medical sciences through integrated modules with continuous emphasis on clinical application; to teach patient communication and clinical skills using simulated and real patients; and to facilitate knowledge integration through problem-solving and the LwLTC thesis.

Phase II Objectives: To develop the student's general clinical skills by working full-time with practicing doctors in a purely clinical environment; to ensure they gain the right experience to develop specified competencies (Outcome-Based); and to provide experience in primary healthcare centers and through elective units.

11. Programme learning outcomes

The curriculum is Outcome-Based, setting standards for newly qualified doctors across three core domains, which are aligned with key clinical presentations:

Outcomes 1: The doctor as a scholar and a scientist:

Biomedical Sciences: Apply principles and knowledge of anatomy, physiology, biochemistry, pathology, pharmacology, etc., to explain normal structure, disease mechanisms, and management.

Psychological and Social Sciences: Apply psychological and sociological principles to explain human behavior, varied responses to disease, and factors contributing to illness, treatment success, and health inequalities.

Population Health: Apply principles of health improvement, epidemiology, communicable disease control, and environmental/occupational hazards to medical practice.

Scientific Method: Apply scientific method to medical research, critically appraise literature, and formulate research questions.

Outcomes 2: The doctor as a practitioner:

Consultation: Carry out a consultation (history, examination, eliciting patient views, explanation, and support).

Diagnosis and Management: Interpret findings, formulate differential diagnoses, plan investigations/treatment (based on evidence and patient partnership), manage emergencies, and identify abuse/neglect.

Communication: Communicate clearly, sensitively, and effectively with patients, relatives, and colleagues, regardless of background, and in difficult circumstances.

Procedures and Prescribing: Provide immediate care (e.g., life support), prescribe drugs safely and effectively, and carry out practical procedures (as listed in Appendix 1).

Information Management: Keep accurate records and use information effectively while adhering to confidentiality.

Outcomes 3: The doctor as a professional:

Ethical and Legal: Behave according to ethical and legal principles, putting patient care first, respecting dignity, and understanding professional responsibilities.

Development: Reflect, acquire new knowledge, establish foundations for lifelong learning, manage time, and seek help when necessary.

Teamwork: Learn and work effectively within a multi-professional team, understanding and respecting the roles of others.

Patient Protection: Place patient needs and safety at the center, promote/maintain health and safety, and address concerns about colleagues' performance or conduct.

Year	Phase	Credit Hours	% of Final Average
First Year	Phase I (S1 & S2)	43	9%
Second Year	Phase I (S3 & S4)	43	14%
Third Year	Phase I (S5 & S6)	46	17%
Fourth Year	Phase II (Blocks)	44	18%
Fifth Year	Phase II (Blocks)	43	18%
Sixth Year	Phase II (Blocks)	58	24%
Total		277	100%

13. Mode of Study

Full time on campus and clinical setting

14. Examination regulations and grading scale

Regulation of university of Duhok are in use

The following grading scale is used:

% Points	Grade
90 – 100	Excellent
80 - < 90	Very Good
70 - < 80	Good
60 - < 70	Medium
50 - < 60	Pass
0 - < 50	Fail

15. Mobility window (if applicable)**16. Work placement(s)/internships (if applicable)**

Work placements are integrated into Phase II (Clinical Curriculum), where students spend almost all their time working full-time in a clinical environment (hospital wards and centers) and primary healthcare centers. The Sixth Year includes Surgical, Medical, Gyne & Obs, Pediatric, and Primary Health Care Apprenticeships.

17. Work-based learning (if applicable)

Work-based learning is a core component, particularly in Phase II, which is conducted in a purely clinical environment (hospitals and primary healthcare centers) through clinical rounds, clinical skills training, and supervised practice. The Job Shadow component (Phase II) also provides mandatory, supervised work-based learning

18. Programme director or equivalent

Medical Education Department

19. Occupational profiles of graduates

Graduates (M.B.Ch.B) are prepared for entry-level medical practice as a doctor (rotating resident/foundation training) and are equipped with the knowledge, skills, and professional values to practice safely and effectively, having achieved the comprehensive capabilities outlined in the Outcome-Based Curriculum

20. Access to further studies

Graduates have access to further studies, including postgraduate programs.

21. Academic Staff

The teaching is delivered by an interdisciplinary team of doctors and scientists drawn from various disciplines and clinical departments across the college
